Reflective Entry (Weekly activities)	Signature and remarks of faculty
<p>We worked on creating the Software Requirements Specification (SRS) for our project. We also worked on our Report in latex. also, we finalized our ML algorithm and Model to work on, and we have selected (NPL for text extraction from CV and job requirements/circular and, DRL for Job matching with the requirements and the job description with the user's data and Support vector machine for initial candidate-job classification. and Decision Tree for evaluating job-candidate fit by analyzing factors such as skills, experience, and location. Besides that, We've completed the user and system diagrams, and finalized the methodology we will use.</p> <p>Here I've attached the SRS link for farther clarification. Link</p>
